

HPT S.r.l.

“High Tech is all we do”

About Us

H.P.T. Srl is a distribution Company founded in 1991, with the mission of supplying high quality products and services to the Semi-Conductor, industrial gases and other related high-tech industries.

HPT current line card includes prestigious brands such as Ap-Tech, Honeywell Analytics, Acesian, Valex, CS Scrubbers among others.

HPT close links to an international group of companies that provide project, design, technical, installation and maintenance services, as well as with companies specialized in QA/QC services market have enabled us to assist our Clients in obtaining timely, efficient and highly qualified, professional services and complete follow-up.

Vision

Acting as the lifeblood of business, we aim to be the engine of progress for innovative companies.

Mission

We manage complex systems with speed and scale, growing everyday in the global fast-paced manufacturing industry.

Values

Guided by integrity, we strive for excellence and reliability, valuing people's health and safety, while fostering creativity, operational agility and shared success.

Premium Insights Into Process

SERVOMEX

GAS Analyser

Asdevice: Hydrocarbons

Tiger Optics: Moisture

Servomex: Oxygen

Meeco: Moisture

GAS Detection

Honeywell: Electrochemical,
Chemical tapes

Senko:
Portables, ATEX

DOD: Chemical
tapes

GAS Distribution

ApTech: Valves and
Pressure Regulators

MOTT: Filters and
Gas Purifiers

Our Portfolio

Toxic gas abatement systems

Cleansorb

Clean-Protect

CleanVent

Ducting and Fittings

Acesian: Straight Ducts, 90°/45° Gore Elbows, Reducers, Blind Plates, Cross Tee, 45° Tee, etc.

Our Portfolio

Services

Gas Detection

On-site Analytical
Services

Maintenance

Remote Assistance

Gas Analyzers Stand Alone

Moisture, Oxygen, Hydrocarbon analyzers

Continuous gas analyzers (CGA)

Gas Chromatographs

Particle counters

Quality control at the inlet-outlet of Gas Purifiers

Gas Analyzers

CQC

Independent system integrator for each specific application

Class 100 clean room assembly

Construction according to SEMI Standard F-20

Scada and connection to Customer FMCS

FMCS installation, maintenance and support

Fully trained and certified personnel

Gas Detection

Fixed and Portable gas detection

Electrochemical, Chemical tape and FTIR technologies

Complete TGMS (Toxic Gas Monitoring Systems)

UHP Gas Distribution Systems

Valves and Pressure Regulators

Duct and Fittings

UHP gas filters POU and Bulk

Gas Purifiers

Toxic Gases Abatement Systems

CLEANSORB

Dry bed removal of process waste gas.

CLEAN-PROTECT

Safeguard against emergency gas release.

CLEANVENT

Mini cartridge for gas cabinet vent lines.

Toxic Gases Abatement Systems

CLEANVENT

It's a gas purge applied before a new gas cylinder is commissioned. Reliable, irreversible conversion of gases to stable solids at room temperature and available for over 100 different gases and organometallic precursors

CLEAN SORB-FABLINE

Is the standard model for the removal of harmful gases such as Fluorinated, trichlorosilane. Available in three different column sizes and can be optimally adapted to the requirements of pilot lines.

CLEAN PROTECT

Hazardous gas disposal provides protection from hazardous gases in the event of uncontrollable leaks.

Used in the chemical, pharmaceutical, and semiconductor industries they have been protecting workplaces and factory environments around the world for decades.

Corrosive Fumes Duct Systems

ACESIAN's ducts are the most resistant corrosive exhaust fume system
Factory Mutual (FM) APPROVED.

Stainless Steel 304/316 ductworks with ETFE coating (Ethylene Tetrafluoroethylene) abrasion resistant and virtually unaffected by all industrial chemicals.

ETFE is also resistant to alkalis, halogens, inorganic compounds and strong inorganic acids.

Services

Maintenance is carried out by professionals with all the necessary skills and specializations for high-tech systems, ensuring production continuity and preventing prolonged downtime.

We ensure prompt interventions with the goal of zero downtime, supported by an integrated spare parts management system based on a Just-In-Time approach and by structured, accurate reporting.
